

CASH RECEIPTS

New England cash receipts from farm marketings totaled \$2.1 billion in 1999, 1 percent below 1998. Cash receipts generated from milk sales continue to be the top contributor to overall marketings, with \$728 million in sales in 1999. Greenhouse & nursery sales, at \$422 million, were the next largest cash contributor. Cash receipts from these two commodities comprised 54 percent of all farm marketings in the six-state region in 1999.

New England's livestock sales, at \$1.1 billion in 1999 were down 2 percent from the previous year, driven by reductions in milk and chicken egg cash receipts. Increased milk production failed to offset a 52 cent/cwt decline in prices received, and cash receipts from milk marketings fell 2 percent below the previous year. Fewer layers in the six state region translated to less eggs produced, and cash receipts from egg sales in 1999 declined by 4 percent. Cattle and calf cash receipts were up 27 percent from 1998, the highest since 1994 due to increased marketings and prices farmers received. Aquaculture cash receipts in 1999 fell 9 percent short of the previous year, due largely to a drop in salmon sales in Maine.

Crop sales in New England were estimated at \$1.0 billion in 1999, 1 percent below a year earlier. Lack of significant rainfall between May and September, and one of the hottest summers on record placed severe stress on many crops produced in 1999. Dry hay producers harvested the smallest crop on record in the region in 1999 due to lack of moisture, and sales in 1999 fell 21 percent below the previous year. Vegetable growers were forced to leave acreage unharvested, and most yields suffered from the drought. Vegetable cash receipts in the region fell by 3 percent compared with the previous year. The dramatic drop in the average price received for Massachusetts cranberries reduced cash receipts to only \$30 million in 1999, down \$40 million from 1998, and returned \$109 million less to growers than in 1997. Cash receipts from the 1998 broadleaf tobacco crop marketed in 1999 fell 24 percent short of the previous year due to the significant drop in average prices growers received. Most other commodities made gains in 1999. Cash receipts generated from apples in 1999 climbed 28 percent above 1998's weather reduced marketings, and dollars generated from fall potatoes increased by 6 percent. Sustained growth in New England's greenhouse & nursery

industry placed 1999 cash returns 5 percent higher than the previous year.

Cash receipts generated from milk secured Vermont's place as first in the region in 1999. Total cash receipts from all agricultural commodities produced in the state were placed at \$542 million in 1999, 2 percent above the previous year. Vermont milk sales remain the top individual contributor to total New England cash receipts. Sales from milk totaled \$413 million, or 76 percent of the Vermont total cash receipts, and 19 percent of New England's 1999 cash receipts total.

Maine ranked second in the region in 1999, with cash receipts totaling \$518 million, 1 percent above the previous year. Potatoes remain the top contributor to Maine's cash receipt total, with \$112 million generated in sales in 1999. Milk sales followed closely, totaling \$110 million in 1999, fractionally above a year earlier.

Connecticut placed third in the region in 1999 with \$483 million generated in the state, fractionally above 1998. Connecticut's greenhouse & nursery industry contributed \$168 million in cash receipts for 1999. Cash receipts from milk in Connecticut totaled \$83 million, 4 percent below the previous year due to declines in milk output and prices received.

Massachusetts followed with \$376 million in total cash receipts, 11 percent below 1998. Greenhouse & nursery sales remain the top contributor to Massachusetts total cash receipts, with sales just over \$127 million in 1999. Due to the reduced value of the 1999 cranberry crop, milk again replaced cranberries as the second major contributor to the state total. Milk cash receipts totaled \$68 million in 1999, down 7 percent from a year ago. A reduced market for cranberries nationwide has driven the price Massachusetts growers receive for berries down from a high of \$70.90/bbl in 1996 to \$16.10/bbl in 1999. Cash receipts from cranberries fell to the lowest level in 20 years in 1999, generating only \$30.2 million, 43 percent below the previous year.

New Hampshire's cash receipts totaled \$154 million in 1999, with greenhouse & nursery sales and milk comprising two-thirds of all receipts. Rhode Island's greenhouse & nursery industry was responsible for 63 percent of the state's \$47 million in cash receipts.
